1 Purpose

The purpose of environmental policy is to define our ambitions for sustainable development.

2 Applicability

LEAX Falun AB

3 Process Owner

Site manager LEAX Falun

4 Generally

This policy is adapted to the organization's purpose and context and supports its strategic direction.

It is the responsibility of every employee to understand and act in accordance with this policy and to inform management of any environmental risks or suggestions for improvement.

It is the responsibility of every leader to ensure that this policy is followed and that we promote a positive development of our work with continuous improvement.

5 Environmental policy

"The day we cease getting better is the day we stop being good!"

Environmental issues are an integral part of LEAX Falun's daily business where we manufacture Propeller Shaft and Transmission Components.

We comply with legal requirements and work with continuous development of methods to protect the environment, prevent pollution and be a good example in the environmental work for our employees and other stakeholders.

We continuously reduce our environmental impact by working for the national environmental goals, focusing on the following three objectives:

Non-Toxic environmental. By regular monitoring of the company's chemical used and acquiring knowledge of health and environmental hazards and thereby replacing hazardous chemicals with less dangerous ones, LEAX Falun will contribute to the national goal.

Limited climate impact. By using only renewable electricity and energy and reducing our consumption, we will contribute to a reduction of the climate impact.

Only natural acidification. Through conscious purchasing and more environmentally friendly fuel, we will contribute to a lower carbon dioxide emission.
