

Production Engineer with knowledge in Gear production

LEAX Group is a manufacturer of mechanical components and subsystems for the heavy vehicle industry, mining and construction industries and other engineering industries. We are a fast growing, privately owned, business group with its origin in Sweden. We have a turnover of more than SEK 1,5 billion on a yearly basis and are about 1200 employees. The company has operations in Sweden, Latvia, Brazil, Germany, Hungary and China. LEAX Group is now gearing up to continue our growth and, therefore, we are now looking for talented, creative and result driven persons to join our company.

Would you like to be part of our global expansion and drive future growth? Would you like to support LEAX to take a further step into the future trends in the market? Do you have knowledge of gear production? Are you flexible and like new challenges? Then you are the person we are looking for!

We are looking for you interested in working at our new top modern production set up at our plant in **Rezekne, Latvia** and who have good knowledge and experience in the field of gear production (such as grinding, honing, power skiving) and CNC machining. To succeed as production engineering at LEAX, it is necessary that you can combine commitment and flexibility as the requirements and conditions can change rapidly. Communication and collaboration internally as well as externally are very important. English in written and spoken is a requirement.

Main responsibilities

Your main task will be to support LEAX in gear production. The tasks include technical preparation, methodology, programming, measurement methods and instructions. When developing instructions and drawings Solid Edge CAD system is used. For programming we use Esprit and Cimco. Systematic work with improvements is included as important part of the work.

You will have the opportunity to work with machine investments, quality assurance, technical and production economics as well as other technical special areas. Everything will depend on your commitment, knowledge and ability.

Profile and Experience

- Knowledge and experience in gear production is a requirement.
- Bachelor degree in Mechanical Engineering. Master program or PhD degree are meritorious.
- Leadership skills with the ability to lead groups in production and engineering.
- English in written and spoken. Other languages such as German, Latvian, Hungarian, Portuguese, Chinese, Russian or Swedish are meritorious.

What we offer?

You will be placed at LEAX Rezekne, located in Rezekne in Latvia, in order to support LEAX with its new production lines. LEAX has a global footprint and therefore we can offer you the opportunity to develop your work in different countries.

We offer you a unique opportunity to develop yourself and stand out as a professional within the future trends in the market. As a global company we have a lot of different people working for us with many different technical and culture background. With our culture of sharing experiences, you will be able to learn with others at the same time you put your knowledge into practice.

As a production engineering with focus on gear production, you will be developing yourself at the same time we make a difference in the market.

How to apply?

Send your CV and cover letter to hr.leaxquality@leax.com with the subject "Production Engineering" **no later than 30th of August 2019**. **Please, highlight in your CV and cover letter your experience within gear production**. If you have any question regarding this position, please contact Joacim Blomberg, VP Common Operations at LEAX Group at +46 70 243 82 03.
