

Environmental policy

The day we cease getting better is the day we stop being good!

Environmental issues are an integral part of Leax Falun's daily operations, where we assemble cardan shafts and manufacture and assemble transmission parts. We comply with laws and other binding requirements and continuously work to develop our methods and working methods to protect the environment, reduce our climate impact, prevent pollution and be a good example in environmental work for our employees and other stakeholders.

We continuously reduce our environmental impact and thereby contribute to combating climate change by working in line with the national environmental quality goals, with a particular focus on the following two goals:

Non-Toxic environmental

Through preventive measures, proper handling of chemicals and hazardous waste, and a continuous efforts to reduce the use of substances hazardous to health and the environment.

Limited climate impact

Through efficient energy use, reduced greenhouse gas emissions, and active efforts aimed at climate-related improvements.
